Travel Studio, Aug 2018 – Aug 2019

Client: A&K (UK Based)

Organization: Open Destination Pvt Ltd

Role: Software Engineer

A web-based end-to-end reservations management platform. With unrivalled functionality and connections to our extensive supplier network, Travel Studio can meet the requirements of any travel business. As a part of enhancement in Travel Studio I worked for multiple Change Requests. I was fortunate enough to get opportunity to work on UI using Angular as well as API where I used MVC and ASP.NET using C#. At database level I worked on stored procedures and on SQL queries at Repository level. This development process also included rounds of unit testing by executing test cases written by QA team as well as writing the Technical Specification Document for the Change Request.

Responsibilities:

- Understanding the Requirements
- Development
- Unit Testing
- OnSite team communication
- Documentation

Worked Tools/Technologies: .Net MVC, Web API, Visual Studio 2015, SQL Server, JIRA

G R Solutions, Jan 2017– July 2018

Organization: G R Solutions

Role: Dot Net Developer

While working in this organization worked on more than 5 different web based application which includes clients like National Fire Service College, complete registration process and admin panel for Pradhan Mantri Awas Yojna and so on.

Responsibilities:

- Understanding the Requirements
- Development
- Unit Testing
- Client Handling
- Documentation

Worked Tools/Technologies: .Net MVC, Web Forms, Visual Studio 2015, SQL Server
